

# Periodic Table Coloring Activity

You have been given a black and white periodic table that needs some color according to the following directions. You will find the following pages in your text book helpful: 17 and 140-141

You may use any colors you like unless specified. Like the diagrams in your book, make a color key so your periodic table may be accurately read. Some boxes may be shaded multiple colors – just make sure you can see them all! Have fun and make them pretty. You don't want to stare at an ugly periodic table 😊

## 1. State of Matter at Room Temperature (solid, liquid, or gas)

- There are two elements that are liquid at room temperature: Hg and Br. Using a blue marker outline the symbols.
- 11 elements exist as gases at room temperature. Outline their symbols using a red marker. H, He, N, O, F, Ne, Cl, Ar, Kr, Xe, Rn
- The remaining elements are solid at room temperature – leave those alone.

## 2. Metals vs. Nonmetals (pg 17)

- With a dark marker add the “stair step” pattern that starts under Boron and extends down to Po and At. This is the division line between metals and nonmetals.
- Choose a marker of any color and outline the area where nonmetals are found (don't forget about Hydrogen!)
- Choose a different color marker and outline the area in the periodic table where the metals are found.

## 3. Metalloids

- Choose any color of a color pencil or crayon and shade in the following elements: B, Si, Ge, As, Sb, Te, Po, and At (*for At only color half the box*). These elements are called metalloids and exhibit both metallic and nonmetallic properties.

## 4. Specific Families and Blocks (use pg 140-141 to help)

- Using color pencils or crayons color each of the following a different color
  - Alkali Metals
  - Alkaline Earth Metals
  - Transition Metals
  - Other metals or Inner Transition Metals
  - Halogens
  - Noble Gases
  - All the rest of the nonmetals (other nonmetals) not in a named family (don't forget about Hydrogen!)

\*Should have 12 different color types and items in your Key
